EDUCATION

College of Southern Nevada, *Computer Science*

2020 March - 2023 April

My degree in computer science where I learned JavaScript and CSS

Udemy, *Python Automation Certification*

2021 June - 2021 August

A certification for a course on data structures and how to use them within the language python. Additionally it aided me in coding my own simple games like tic-tac-toe.

Udemy, *Python Certification*

2021 March - 2021 June

A certification for the programming language python. It trained me to utilize proper syntax and introduced me to how to code my own projects.

PROJECTS

Portfolio Website — *Python, HTML, CSS, Javascript, and Django*

- I currently have two portfolio websites. One being a dynamic python based website and the other being a more traditional static website

Automated Calendar — *Python and Google's Calendar API*

- A calendar input system that can change, add, and delete events/calendars.
- Can send events and calendars to others as well as the main user.
- There is an additional change color button to further organize the calendar.

Code Box — *Python and Discord's API*

- A Discord bot that can take in a message as a command and send back an appropriate response.

Misc. Games — *Python*

- A full set of miscellaneous games including: Blackjack, Tic-Tac-Toe, and Battleship.
- Every game is able to be played with another person or against a computer.

SKILLS

Python.

Django.

HTML.

Git.

Ubuntu.

CSS.

JavaScript.
